

Smart Grid Standards Information

Version 1.7

Tuesday, August 17, 2010

Section I: Use and Application of the Standard

Identification and Affiliation

	Number of the standard	C62.11
	Title of the standard	Metal-Oxide Surge Arresters for AC Power Circuits (>1 kV)
	Name of owner organization	Institute of Electrical and Electronics Engineers (IEEE)
	Latest versions, stages, dates	Approved 29 December 2005
	URL(s) for the standard	http://standards.ieee.org
	Working group / committee	Surge Protective Devices Committee
	Original source of the content (if applicable)	IEEE
	Brief description of scope	This standard applies to metal-oxide surge arresters (MOSAs) designed to repeatedly limit the voltage surges on 48 Hz to 62 Hz power circuits (>1000 V) by passing surge discharge current and automatically limiting the flow of system power current. This standard applies to devices for separate mounting and to devices supplied integrally with other equipment. NOTE—These tests demonstrate that an arrester can survive the rigors of reasonable environmental conditions and system phenomena while protecting equipment and/or the system from damaging overvoltages caused by lightning, switching, and other undesirable surges.

Level of Standardization

1.	Names of standards development organizations that recognize this standard and/or accredit the owner organization	ANSI, IEC
	Has this standard been adopted in regulation or legislation, or is it under consideration for adoption?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
	Has it been endorsed or recommended by any level of government? If "Yes", please describe	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
	Level of Standard (check all that apply)	<input checked="" type="checkbox"/> International <input type="checkbox"/> National <input checked="" type="checkbox"/> Industry <input type="checkbox"/> de Facto <input type="checkbox"/> Single Company
	Type of document	<input checked="" type="checkbox"/> Standard <input type="checkbox"/> Report <input type="checkbox"/> Guide <input type="checkbox"/> Technical Specification

Section I: Use and Application of the Standard

	Level of Release	<input checked="" type="checkbox"/> Released <input type="checkbox"/> In Development <input type="checkbox"/> Proposed
Areas of Use		
1.	Currently used in which domains? (check all that apply)	<input type="checkbox"/> Markets <input type="checkbox"/> Operations <input type="checkbox"/> Service Providers <input checked="" type="checkbox"/> Generation <input checked="" type="checkbox"/> Transmission <input checked="" type="checkbox"/> Distribution <input checked="" type="checkbox"/> Customer
	Planned for use in which domains? (check all that apply)	<input type="checkbox"/> Markets <input type="checkbox"/> Operations <input type="checkbox"/> Service Providers <input type="checkbox"/> Generation <input type="checkbox"/> Transmission <input type="checkbox"/> Distribution <input type="checkbox"/> Customer
	Please describe the Smart Grid systems and equipment to which this standard is applied	

Section I: Use and Application of the Standard

Relationship to Other Standards or Specifications
--

Section I: Use and Application of the Standard

1.	Which standards or specifications are referenced by this standard?	<p>ANSI Std C37.42-1996, American National Standard for Switchgear-Distribution Cutouts and Fuse Links-Specifications.</p> <p>ANSI Std C62.2-1987, Guide for the Application of Gapped Silicon-Carbide Surge Arresters for Alternating Current Systems.</p> <p>ANSI Std C84.1-1995 (Reaff 2001), American National Standard Voltage Ratings for Electric Power Systems and Equipment (60 Hz).</p> <p>ASTM A153/153M-04, Specification for Zinc Coating (Hot-Dip) on Iron and Steel Hardware.</p> <p>ASTM D750-00, Standard test method for rubber deterioration in carbon-arc weathering apparatus.</p> <p>ASTM D1499-99, Standard practice for operating light and water exposure apparatus (carbon-arc type) for exposure of plastics.</p> <p>ASTM D2565-99, Standard practice for xenon arc exposure of plastics intended for outdoor applications.</p> <p>ASTM D3487-00, Specification for Mineral Insulating Oil Used in Electrical Apparatus.</p> <p>ASTM G23-96, Standard practice for operating light and water exposure apparatus (carbon-arc type) with and without water for exposure of nonmetallic materials.</p> <p>ASTM G26-96, Standard practice for operating light and water exposure apparatus (Xenon-arc type) with and without water for exposure of nonmetallic materials.</p> <p>ASTM G53-96, Standard practice for operating light and water exposure apparatus (fluorescent UVcondensation type) for exposure of nonmetallic materials.</p> <p>IEC 60815 (1986), Guide for the selection of insulators in respect to polluted conditions.</p> <p>IEEE Std C37.09™-1999, IEEE Standard Test Procedure for Alternating Current High-Voltage Circuit Breakers Rated on a Symmetrical Current Basis.</p> <p>IEEE Std C62.22™-1997, IEEE Guide for the Application of Metal Oxide Surge Arresters for Alternating Current Systems.</p> <p>IEEE Std 4™-1995 (Amended 2001), IEEE Standard Techniques for High-Voltage Testing.</p> <p>IEEE Std 386™-1995, IEEE Standard for</p>
----	--	--

Section I: Use and Application of the Standard

	Which standards or specifications are related to this standard?	62.11a-2008
	Which standards or specifications cover similar areas (may overlap)?	
	What activities are building on this work?	

Dept of Energy Smart Grid Characteristics

Please describe how this standard may encourage each of the following:

1.	Enables informed participation by customers	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
2.	Accommodates all generation and storage options	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
3.	Enables new products, services and markets	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
4.	Provides the power quality for a range of needs	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
5.	Optimizes asset utilization and operating efficiency	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
6.	Operates resiliently to disturbances, attacks, and natural disasters	<input type="checkbox"/> Yes <input type="checkbox"/> No

Priority Areas Previously Mentioned by FERC and NIST

Please describe if and how this standard may be applied in each of the following areas. Note that there is space in section Error: Reference source not found to discuss any other significant areas where the standard may be applied.

1.	Cybersecurity and physical security	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
2.	Communicating and coordinating across inter-system interfaces	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
3.	Wide area situational awareness	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
4.	Smart grid-enabled response for energy demand	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
5.	Electric storage	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
6.	Electric vehicle transportation	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
7.	Advanced metering infrastructure	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
8.	Distribution grid management	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

Openness

1.	Amount of fee (if any) for the documentation	\$89
2.	Amount of fee (if any) for implementing the standard	None
3.	Amount of fee (if any) to participate in updating the standard	None
4.	Is the standard documentation available online?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No URL: http://shop.ieee.org
5.	Are there open-source or reference implementations?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
6.	Are there open-source test tools?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
7.	Would open-source implementations be permitted?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
8.	Approximately how many implementers are there?	
9.	Approximately how many users are there?	
10.	Where is the standard used outside of the USA?	
11.	Is the standard free of references to patented technology?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
12.	If patented technology is used, does the holder provide a royalty-free license to users of the standard?	<input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not Patented
13.	Can an implementer use the standard without signing a license agreement?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
14.	Are draft documents available to the public at no cost?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
15.	How does one join the working group or committee that controls the standard?	
16.	Is voting used to decide whether to modify the standard? If Yes, explain who is permitted to vote.	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
17.	Is an ANSI-accredited process used to develop the standard?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
18.	What countries are represented in the working group or committee that controls the standard?	

Support, Conformance, Certification and Testing

1.	Is there a users group or manufacturers group to support this standard?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
2.	What is the name of the users group or manufacturers group (if any)?	
3.	What type of test procedures are used to test this standard? (please check all that apply)	<input type="checkbox"/> Internal to the lab <input type="checkbox"/> Published by standards organization <input type="checkbox"/> Published by users group <input checked="" type="checkbox"/> No procedures, informal testing
4.	Are there test vectors (pre-prepared data) used in testing? (please check all that apply)	<input type="checkbox"/> Internal to the lab <input type="checkbox"/> Published by standards organization <input type="checkbox"/> Published by users group <input checked="" type="checkbox"/> No procedures, informal testing
5.	What types of testing programs exist? (check all that apply)	<input type="checkbox"/> Interoperability Testing <input type="checkbox"/> Conformance Testing <input type="checkbox"/> Security Testing <input checked="" type="checkbox"/> No Testing
6.	What types of certificates are issued? (check all that apply)	<input type="checkbox"/> Interoperability Certificate <input type="checkbox"/> Conformance Certificate <input type="checkbox"/> Security Certificate (text document) <input checked="" type="checkbox"/> No Certificates
7.	Are there rules controlling how and when to use the logo?	<input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Standard has no logo
8.	Is there a program to approve test labs?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
9.	Approximately how many test labs are approved (if any)?	
10.	Is there a defined process for users to make technical comments on the standard or propose changes to the standard and have these issues resolved?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
11.	Is there a published conformance checklist or table?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
12.	Are there defined conformance blocks or subsets?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
13.	Approximately how many vendors provide test tools?	
14.	Are there tools for pre-certification prior to testing?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
15.	Can vendors self-certify their implementations?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
16.	Is there application testing for specific uses?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not applicable
17.	Is there a "golden" or "reference" implementation to test against?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
18.	Who typically funds the testing? (check all that apply)	<input checked="" type="checkbox"/> User <input type="checkbox"/> Users Group <input type="checkbox"/> Vendor <input type="checkbox"/> Confidential
19.	Is there a method for users and implementers to ask questions about the standard and have them answered? (check all that apply)	<input checked="" type="checkbox"/> Yes, official interpretations <input type="checkbox"/> Yes, informal opinions <input type="checkbox"/> No
20.	Does the users' group (or some other group) fund specific tasks in the evolution of the standard?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
21.	Is the users' group working on integration, harmonization or unification with other similar standards?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

22.	What other standards is this standard being integrated, harmonized, or unified with (if any)?	
23.	Are there application notes, implementation agreements, or guidelines available describing specific uses of the standard?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not applicable

J. Notes

Please present here any additional information about the standard that might be useful:

1.	
----	--

Section II: Functional Description of the Standard

GridWise Architecture: Layers

Please identify which layers this standard specifies, as described in

http://www.gridwiseac.org/pdfs/interopframework_v1_1.pdf, and the applicable section of the standard. Note the mapping to the Open Systems Interconnect (OSI) model is approximate.

1.	Layer 8: Policy	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
2.	Layer 7: Business Objectives	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
3.	Layer 6: Business Procedures	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
4.	Layer 5: Business Context	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
5.	Layer 4: Semantic Understanding (object model)	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
6.	Layer 3: Syntactic Interoperability (OSI layers 5-7)	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
7.	Layer 2: Network Interoperability (OSI layers 3-4)	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
8.	Layer 1: Basic Connectivity (OSI layers 1-2)	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No

GridWise Architecture: Cross-Cutting Issues

Please provide an explanation in the box beside the heading for any questions answered "Not applicable". If the question is not applicable because the function is provided in another layer or standard, please suggest any likely candidates. Note that "the standard" refers to the technology specified by the standard, not the documents themselves.

	Shared Meaning of Content	
1.	Do all implementations share a common information model?	<input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not applicable
2.	Can data be arranged and accessed in groups or structures?	<input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not applicable
3.	Can implementers extend the information model?	<input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not applicable
4.	Can implementers use a subset of the information model?	<input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not applicable
	Resource Identification	
5.	Can data be located using human-readable names?	<input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not applicable
6.	Can names and addresses be centrally managed without human intervention?	<input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not applicable
	Time Synchronization and Sequencing	
7.	Can the standard remotely synchronize time?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Provided in another layer
8.	Can the standard indicate the quality of timestamps?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Provided in another layer
	Security and Privacy	
9.	Where is security provided for this standard?	<input type="checkbox"/> Within this standard <input checked="" type="checkbox"/> By other standards
10.	Does the standard provide authentication?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
11.	Does the standard permit role-based access control?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

Section II: Functional Description of the Standard

12.	Does the standard provide encryption?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
13.	Does the standard detect intrusions or attacks?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
14.	Does the standard facilitate logging and auditing of security events?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
15.	Can the security credentials be upgraded remotely?	<input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> No Credentials
16.	Can the security credentials be managed centrally?	<input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> No Credentials
17.	Please list any security algorithms and standards used	
18.	Please provide additional information on how the standard addresses any "Yes" answers above	
19.	Please provide additional information about why any of the questions listed above do not apply to this standard	
Logging and Auditing		
20.	Does the standard facilitate logging and auditing of critical operations and events?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
21.	Can the standard gather statistics on its operation?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Not applicable
22.	Can the standard report alerts and warnings?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Not applicable
Transaction State Management		
23.	Can the standard remotely enable or disable devices or functions?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Not applicable
System Preservation		
24.	Can the standard automatically recover from failed devices or links?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Not applicable <input type="checkbox"/> Provided in another layer
25.	Can the standard automatically re-route messages?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Not applicable <input type="checkbox"/> Provided in another layer
26.	Can the standard remotely determine the health (as opposed to just connectivity) of devices or software?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Not applicable
Other Management Capabilities		
	Please describe any other system or network management capabilities the standard provides.	
Quality of Service		
27.	Is data transfer bi-directional?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
28.	Can data be prioritized?	<input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not applicable
29.	What types of reliability are provided?	<input type="checkbox"/> Reliable <input checked="" type="checkbox"/> Non-guaranteed <input type="checkbox"/> Both <input type="checkbox"/> Either <input type="checkbox"/> Provided in another layer
30.	Can information be broadcast to many locations with a single transmission?	<input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not applicable
	Please describe any other methods the standard uses to manage quality of service.	
Discovery and Configuration		
31.	Can the software or firmware be upgraded remotely?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Not applicable

Section II: Functional Description of the Standard

32.	Can configuration or settings be upgraded remotely?	<input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not applicable
33.	Can implementations announce when they have joined the system?	<input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not applicable
34.	Can implementations electronically describe the data they provide?	<input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not applicable
System Evolution and Scalability		
35.	What factors could limit the number of places the standard could be applied?	
36.	What steps are required to increase the size of a system deploying this standard?	
37.	Is the information model separate from the transport method?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
38.	Does the standard support alternate choices in the layers(s) below it?	<input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> No layers below
39.	List the most common technology choices for layers implemented below this standard	
40.	Does the standard support multiple technology choices in the layers above it?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> No layers above
41.	List the technologies or entities that would most commonly use this standard in the layer above	
42.	Please describe any mechanism or plan to ensure the standard is as backward-compatible as possible with previous versions	
43.	Please describe how the design of this standard permits it to be used together with older or legacy technologies	
44.	Please describe how the design of this standard permits it to co-exist on the same network or in the same geographic area with similar technologies, and give examples	
45.	Electromechanical	

Architectural Principles

Please describe how this standard may apply any of these principles:

1.	Symmetry – facilitates bi-directional flow of energy and information	
2.	Transparency – supports a transparent and auditable chain of transactions	
3.	Composition – facilitates the building of complex interfaces from simpler ones	
4.	Loose coupling – can support bilateral and multilateral transactions without elaborate pre-arrangement	
5.	Shallow integration – does not require detailed mutual information to interact with other components	

Section II: Functional Description of the Standard

6.	Please list any other architectural models, reference architectures or frameworks this standard was designed to be compliant with, e.g. W3C, IEC TC57, OSI and how it fits those models	
----	---	--
